

1800 Table Base Assembly Instructions

Parts List

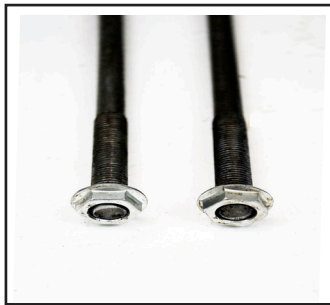

- (4) Hex Nuts
- (2) Rods
- (1) Square Plate
- (1) Column
- (1) Base Cover
- (1) J-Plate

Tools List

- 3/8" Socket
Wrench

1.

On one side of each rod screw hex nut in flush with end of rod.

2.

Slide J-Plate down rods.

3.

Place column over rods. Threaded end of rods should be exposed.

4.

Slide base cover down column.

Place square plate over rods. Threaded end of rods should be exposed.

Screw hex nuts to exposed threaded rod. Tighten completely with socket wrench.

Last, slide base cover up column. Bolt down j-plate to floor for finished product.
